

H5P Content Guidelines

DIKSHA platform supports creation and consumption of H5P content. But there are certain limitations to the type of content that renders well on its player.

Following tables provide a list of H5P content types that are supported and not supported. Please note that this is only an indicative list.

It is also possible that some type of content doesn't render well on a mobile screen due to its layout. Hence the creator/reviewer should preview the content and make sure it plays properly before publishing it.

H5P content types that are supported :

Content types supported			
Accordion	Find Multiple Hotspots	Find Multiple Hotspots	KewAr Code
